

Bloomberg

MOVE THE MARKETS. Build the best.

RESEARCH AND DEVELOPMENT INTERVIEW DAY

Now interviewing in San Francisco for positions in New York and New Jersey

DESCRIPTION

Bloomberg is the leading global provider of financial data, news and analytics. The BLOOMBERG PROFESSIONAL service provides real-time and archived financial and market data in a single, integrated package. Bloomberg's R&D department is seeking experienced software engineers, web developers, system administrators, database administrators and network engineers to design, develop and maintain the next generation of Bloomberg products. This is an opportunity to join a diverse, industry-knowledgeable, technically skilled team.
